WORK EXPERIENCE

Full Stack Developer

TOJO Global - Uttara, Dhaka | April 2025 - Present

- Developed **TS-Geosystems Bangladesh** also **FaizyLegend** fully dynamic platforms with custom dashboards, secure payments, and robust product management.
- Managed frontend and backend for company websites, optimizing performance, scalability, and SEO while collaborating with one teammate.

ReactJS Developer (Intern)

NestedFor - islamabad, Pakistan | Nov 2024 - Feb 2025 | [View Certificate](#)

- Developed responsive web applications and integrated backend functionality for Shopify apps and internal dashboards using React.js.
- Translated Figma designs into interactive interfaces, ensuring UI/UX consistency across devices while working independently on projects like **Trip Dashboard** and **Displate Demo**.

PROJECTS

TS-Geosystems Bangladesh - Surveying Equipment Sales & Management Portal

[Live Site](#)

- Fully dynamic and responsive e-commerce platform for TS-Geosystems Bangladesh.
- Features a custom admin dashboard, secure SSLCommerz payment gateway, and robust product bank.
- Ensured secure transactions, implemented dynamic pages with component-level enable/disable options, and optimized for SEO.
- Built over 3+ months as a full-stack developer, collaborating with one teammate.

Technologies: React, TypeScript, Tailwind CSS, Redux Toolkit, Framer Motion, TanStack React Query, Headless UI, Radix UI, TinyMCE, clsx, Node.js, Express.js, Multer, JWT, Bcrypt, Nodemailer, MySQL, SSLCommerz

Blog Application - Modern Blogging Platform

[Live Site](#) | [Client](#) | [Server](#)

- Modern web app allowing users to create, manage, and interact with blog posts.
- Logged-in users can like/unlike posts; comments support emojis, anonymous posting, and editable entries for logged-in users.
- Features category-wise filtering, blog search, responsive mobile-friendly design, bookmarking, and image uploads via ImgBB.

Technologies: React.js, Redux, emoji-picker-react, Tailwind, Node.js, Express.js, axios, JWT, TanStack Query, Firebase, MongoDB

Gadxtreme - Gadget E-Commerce Project

[Live Site](#) | [Client](#) | [Server](#)

- Responsive e-commerce project with secure login, fast loading, Swiper carousel, and AOS for seamless browsing.
- Users can add products to cart, purchase via SSLCommerz, manage dashboards, view order history, and track pending reviews.
- Admin dashboard allows managing users, assigning roles, updating order statuses, and real-time updates for pricing, quantity, filters, sorting, and pagination.
- Buyers can leave reviews after order delivery; the platform ensures a smooth shopping experience.

Technologies: React.js, Tailwind, SSLCommerz, axios, JWT, TanStack Query, Firebase Auth, Node.js, Express.js, MongoDB

ACADEMIC PROJECTS

MBSTU BookHaven - Student Book Sharing Platform

[Live Site](#) | [Client](#) | [Server](#)

- Full-stack platform enabling university students to exchange and track hard-copy books.
- Role-based authentication for students and admins, with an intuitive dashboard featuring charts and analytics.
- Admin dashboard allows managing users, assigning roles, updating order statuses, and real-time updates for pricing, quantity, filters, sorting, and pagination.

Technologies: React, Lottie-react, Tailwind CSS, react-countup, Flowbite, Node.js, Express.js, JWT, MongoDB, Firebase.

Some Team Projects I Participated In: **Food Nutrition Management System (2nd Year)**, **Kill Covid 19 Game (1st Year)**

LANGUAGE

Bangla (Native), **English** (Professional Proficiency), **Hindi** (Native)
